Rev. Geo. A. Shields,
Minister.

CARD OF THANKS

For all expressions of sympathy, and to all those who sent flowers or assisted in any manner whatever, during our recent bereavement, we extend our most heartfelt thanks and gratitude.
Mr. and Mrs. John Northcutt and family.

Mineral Survey in Far North

During the coming summer an investigation of the mineral and other natural resources of the Coppermine River mineral reserve on the Canadian Arctic coast will be undertaken by Major L. T. Burwash, exploratory engineer of the Department of the Interior. Special attention will be paid to determining the extent and value of deposits of copper which are understood to exist in this far northern section of the Northwest Territories.

Application for Lease of Road Allowance or Surveyed Highway

Notice is hereby given that J. D. Rogers, of Bindloss, has made application to the Minister of Public Works, Edmonton, for a lease of the following road allowance or surveyed highway, viz.: North of Sec. 10, 11 and 12, T. 22, R. 1, S. 4; North of Sec. 24, 25 and 26, T. 21, R. 2, S. 4; North of Sec. 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, T. 21, R. 2, S. 4; North of Sec. 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

Ball Game Played

On Saturday
Buffaloes vs. Empresses
(Junior Teams)

The ball game played on Saturday, between the Empresses and Buffaloes, was left at tie, 6-6; it was too windy and dusty to finish the game.

Both teams played well considering the amount of practice they have had. Buffalo started out good by hanging in a number of runs in the first three or four innings, this however made the Empresses play as they never played before.

It was very exciting during the last couple of innings but too windy to finish the game, and if you had been there you would have had your eyes full of dust.

It was decided that a game be played at Bindloss in a week or so.

Foundry Company to Build in Calgary

It is announced from Calgary that a five-acre site has been purchased from the city by the Antlers Foundry Co. of Toronto and Winnipeg. It is expected that construction will be started later in the year on a factory for the production of steel pipes, radiators, boilers and other foundry special work.

Automobile Accident Victims Are Laid To Rest in Peace

Funerals Are Largely Attended. Strong Feeling of Sympathy Evidenced At Each Funeral.

The victims of the fatal automobile accident were laid to rest during the past week. Crowded attendance at each funeral service evidenced the deep impression made on the community by the shocking calamity. The accident has been the topic of talk this past week and has summoned all other matters of local interest.

Richard David Shannon

(OBITUARY)

The death occurred of Richard David Shannon on Thursday, May 30th, as the result of a tragic automobile accident, in which four local men lost their lives.

Mr. Shannon was born on the farm homestead near Arnprior, Ontario, in 1875.

In 1902 he came to the Forks of the Red Deer, where his brothers, William Robert and Leslie had preceded him by several years and were already ranching cattle and horses at the old Shannon ranch on the Red Deer River. David also became interested in this enterprise and remained in this business to the time of his death.

In 1908, he, with other members of the family, became interested in a lumber camp at Vernon, B.C. These interests continued for four or five years.

In 1923, he went to Great Falls, Montana, U.S., where he remained until 1926, returning at that time to Empress, where he had since resided.

He is survived by five brothers and one sister, as follows: William, of Medicine Hat, Alta.; Robert, of Chilliwick, B.C.; Mrs. Elizabeth Conn, of Ottawa; John, of Arnprior, Ont.; and George and Leslie, of Empress, Alta.

The funeral was held from the United Church in Empress, and the service was conducted by the Reverend George A. Shields, on Friday, May 31st at 3 p.m. The pall bearers were: Clinton Jarboe, James Wilson, Harvey Massingill, Graham Massingill, Sidney Hamilton and Paul Jones.

The body was interred in the Empress cemetery.

John Ivan Northcutt

The funeral of John Ivan Northcutt, son of Mr. and Mrs. John Northcutt, took place on Friday, May 31st, at the United Church, Empress. The church was filled to overflowing with sympathizing friends and neighbors. Deceased was in his 31st year. He was one of the

victims of the distressing accident of May 30. Rev. Geo. A. Shields conducted the service. Singing was led by the choir of the United Church. The message of the Minister to the bereaved, was followed with interest by these present. Members of the family attending were: Mr. and Mrs. John Northcutt, Miss Hazel and Walter and Leonard Northcutt. A mass of floral tributes rested on the casket. A large cortege followed the remains to the Empress cemetery, where the last rites were administered and interment made.

Frank Barry

The funeral of Frank Barry, a victim of the fatal automobile accident of May 30th, was held on Tuesday, June 4th. Deceased was 40 years of age. Mass was said in the morning and a short funeral service was held at the house. The service was from the Roman Catholic Ritual and was conducted by Rev. Father Leo Sullivan assisted by Rev. Father J. Lynett, of Oyen, Alberta, Rev. Father Joseph Fay, of Hanna, Alta., Mr. Frank Lydeman assisted in the choir. Members of the family present were: Mrs. Harry, Misses Ethel and Dorothy and Rawleigh, Mr. and Mrs. Smart and baby and Mr. and Mrs. J. Rawlings. The casket was covered with a large number of beautiful floral tributes from friends and relatives. The remains were laid to rest in the Empress cemetery. A large number of cars drove to the cemetery and the last rites were performed in the midst of a large circle of mourners who testified their last respects to the passing of one of this country's pioneer ranchers and farmers.

Henry Hoffman

The body of Henry Hoffman, fourth victim of the tragic automobile accident, was taken to Medicine Hat on Thursday afternoon last, for burial there, by his parents.

Wedding

The marriage of Myrtle Vel. son, daughter of Mr. and Mrs. E. H. Poirault, to Mr. Stanley Bowers, of Calgary, took place in that city on May 24. Citizens will join in the general expressions of goodwill for the happy couple during their married life.

Northern Indian Reserve Opened For Settlement

Keen interest is being shown in the announcement that an additional 20,000 acres of Indian lands in the Peace River district will shortly be opened for settlement. A public sale of several reserves located on the north side of the Peace River will be held at Fairview on Saturday, June 15th. The large single tract to be included is the Beaver Indian Reserve and joining the town of Fairview and as this comprises some excellent farm land, bidding is expected to be brisk.

Alberta Parks Popular With Tourists

A total of 27,335 cars entered the Rocky Mountain National Park through the Kananaskis gate during the year ending March 31, 1928, according to the recently issued report of Dominion Parks Commissioner. Of this number 25,800 were Canadian cars and 1,535 were American. Waterton Lakes Park in Southern Alberta attracted 15,547 motor tourists while Banff and Elk Island Parks had 12,679 and 16,138 visitors respectively and Jasper Park, which is accessible as yet only by railway, had approximately 12,400 visitors.

Ovenidish
7.30 p.m., Evensong and Sermon.

The Rev. H. J. Hanoux, of Cabri, will conduct all services.

"London after Midnight"

A strange old haunted castle in England, over which hang sinister legends of long ago and astounding vampire superstitions, still believed in by many—particularly the peasant class—concerning the 'un-dead' which haunt graveyards and wander between life and death, as malevolent avengers—these form the background of Lon Chaney's latest characterization in "London After Midnight," playing at the Empress Theatre, this week.

Fantastic shadows, weird apparitions in uncanny surroundings, and a supernatural horror are abounds for an astounding plot which by the use of mental science the detective unearths and reduces to everyday fact in this strange romance. Chaney wears a series of uncanny disguises as the man-tracker, and a notable cast surround him.

Owing to lack of time and space we are not making any further report on the Empress Sports Day.

The FORD Motor Company

Advise that they are now making in the United States and Canada, a total of around

9,000 Cars Daily

This makes FORD the largest manufacturer of cars again, the position he held with the Model T.

This means that every day 9,000 people are buying Ford Cars. WHY, because they get more value for their money than in any other make. It must be so, if not why are they sold?

FORD is leading in sales all over the country, and if you need the best possible value for your money, let us prove it with a demonstration.

A complete line of MODEL T. and MODEL A. parts in stock. Can any other claim the same for his Car?

N. D. Storey, the Ford Man

The Power Of Small Things

The following item was recently printed in a large number of newspapers:

"Forty-five years ago there was a strike in an Ohio coal mine. A group of enraged miners took a car of coal, set it afire, and pushed it down into the mine. That fire is still burning under ground, spreading many miles, destroying valuable coal deposits and rendering hundreds of acres of surface ground sterile. Today it threatens to destroy a school building and some homes in a village. Burning beneath them it is undermining the ground and may cause them to collapse. The fire that a moment's anger started 45 years ago certainly turned out to be a bigger thing than the men who started it ever imagined."

There is a moral to this incident, which might well be heeded, for after all, it is but an illustration, a spectacular one, it is true, of almost every day happenings. The moral is that a small act may have far-reaching consequences, either for good or for evil.

A cow kicked over a lamp in a barn in Chicago, and the Great Chicago Fire resulted.

A frenzied student assassinated an Austrian Grand Duke and his wife, and the Great War was the immediate outcome with its sacrifice of ten millions of lives and hundreds of billions of dollars in property and other losses.

An employee is dismissed in anger, and perhaps unjustly, and a nationwide strike follows bringing suffering and ruin in its wake.

A careless workman, or a dishonest contractor, neglects to put a sufficient quantity of cement in the foundations of a building or in the piers for a bridge, or the retaining wall of a dam, and disaster follows taking heavy toll in human lives.

A rotten timber is used in building a ship, and the vessel sinks; a faulty rail is laid in a track, the train is wrecked; a careless camper neglects to put his fire, and a terrible conflagration wages out to a forest.

And how often has a hasty word, an insulting remark, led to family and business estrangements with dire results to all concerned.

How often, too, has the rancor and friendliness of an entire community been destroyed because of the whispered scandal, the unguarded reflection upon the honor and integrity of another, the prejudiced utterance casting aspersions upon some of those different races and different nations.

All little things in comparison to their terrible effects and disastrous results!

Fortunately, for the human family, the reverse is also true. We still recall our childhood's interest in the story of the little Dutch boy who by sticking his finger in the small hole in a dam saved his country from inundation. We delight in the personal histories of great men and women who were started on their careers by the kindly, encouraging word of some friend.

We know, too, by personal observation that the mighty oak is born of the humble acorn; that it was in a single kernel of wheat the hundreds of millions of bushels of Marquis wheat annually harvested in Western Canada had their origin.

If we would but remember and give heed to the fact that, just as a pebble thrown into the water causes a widening circle of ripples, so too we sweep its surface until finally they lose themselves upon the shore, so does every word and act of ours create little circles of influence radiating out into our homes, our offices, our communities and the world at large, and, for good or ill, affecting the lives and future of others and of our country, then, perchance, we would be more careful, more considerate, a little less hasty and impatient of others, and more inclined to extend that degree of sympathy and tolerance to others which we naturally expect will be displayed towards us.

Local Option In India

Voters In Town Of Maran "Dry" To A Man

An astonishing thing has happened in the Punjab. Citizens of the town of Maran have lately secured from the Provincial Government the privilege of holding a local option election as to whether liquor shops in the town should continue to operate. Over fifteen hundred voters went to the polls and voted "dry" to a man. This is probably the most decisive local option vote yet recorded in any country. The nearest approach to it possibly occurred in Kentucky some twenty years ago when about the same number of voters were cast, and all were "dry" except those of the two "liquor

dealers and their relatives—seven in all.

Worms are encountered by mankind in all the shapes and sizes, and are so subtle. Miller's Worm Powders will sweep these creatures out, immediately and will sweep the worms away. No destructive parasites can live in contact with this medicine, which is not only a worm destroyer, but a health-giving medicine most beneficial to the young constitution.

Encouraging Business Outlook

Volume Of Business At A High Limit For First Three Months Of Year

Business activity generally in Canada during the first three months of this year was greater than any similar period since the war, according to an official review of the current business situation in the Dominion.

The dollar volume of business, as indicated by bank debits at the clearing house centres, was at a higher level during the first quarter of 1929 than at any similar preceding period since the record was first compiled in 1924. The total in the first three months of the present year was 18 per cent. greater than in 1928, 50 per cent. in excess of the aggregate in the same period of 1927, the total in the first three months of 1929 being \$115,000,000,000.

I noticed your wife sitting by the window sewing this morning. I thought you told me she was ill?" "Yes; but, today she's out on the mend!"

Asked what he understood by "fourteen entanglements," a school-boy replied, "Spagetti."

Scientists profit a "blessed race. The boer is apparently not the only pest threatening the corn crop.

Minard's Liniment for cuts and bruises.

The World's Air Centre

British Ports Will Be Headquarters In Next Decade In Prediction

Only a decade or two hence and airplanes and airships may be leaving British ports for all quarters of the Empire and of the world as regularly as steamers do now. From coach to railway, from sailing ship to the steam and old-driven boats of today, from the horse to the car, from the balloon to the airplane the great job of annihilating time and space goes on. And at each new step, in each successive phase, British inventiveness, British engineering, and British pluck are in the fore. In the air as on the water, Nature has marked us down as the centre of the world.—London Daily Express.

WOMEN WHO SUFFER

Anemia Responsible For Most Of The Ills Of Girls and Women

Medical science shows that most of the ills that afflict growing girls and women are due to a shortage of blood. It is either poor in quality or deficient in quantity. This anemia is the cause of low spirits, languidness, poor appetite, breathlessness, and nervousness. It is the cause of the burden for so many women. There is no more to be said than this: in this way, for all the miseries of anemia can be quickly banished by taking Dr. Williams' Pink Pills. It is an established fact that these pills can change the blood, and thus the blood—their wonderful reputation is due to that.

Thousands of formerly weak and ailing women have cheerfully testified to the fact that they owe their restoration to good health to Dr. Williams' Pink Pills. One of the Pink Pills, Dr. W. L. Williams says, "I am among those who can strongly recommend Dr. Williams' Pink Pills. Before I began using them I was in an extremely nervous condition. I could not sleep, could not eat, and was constantly growing weaker. I got medicine from a doctor, but it did not seem to meet my condition. It was on the recommendation of a friend, I took Dr. Williams' Pink Pills. By the time I had taken a couple of boxes there was no doubt they were helping me. I continued their use until I had taken six or seven boxes when I was again the best of health. I always keep Dr. Williams' Pink Pills in the house, and if any member of the family feels run-down the pills soon put them in good condition."

The best time to begin taking Dr. Williams' Pink Pills is the moment you feel the least bit out of sorts. The sooner you do so the sooner you will retain your old-time energy. You can get these pills through any medicine dealer or by mail, postpaid at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Agricultural Wealth Of Canada

Figures Show The Importance Of Our Basic Industry

The gross agricultural wealth of Canada for the year 1928 is estimated at approximately \$5,027,301,000, an increase of \$19,353,000 over the 1927 estimate.

The total agricultural revenue of the nine provinces, Ontario, \$500,821,000; Saskatchewan, \$392,000,000; Quebec, \$277,050,000; Alberta, \$254,028,000; Manitoba, \$148,607,000; British Columbia, \$20,710,000; Nova Scotia, \$40,102,000; New Brunswick, \$34,307,000 and Prince Edward Island, \$21,750,000.

Headache

Relieved without "dosing." Rub on VICKS

Baby's restless nights might be avoided

Scalded skin and other skin troubles are common causes of restlessness, and often could not be avoided by careful bathing with Baby's Own Soap.

In frigid lather cleanses and heals Baby's skin, and prepares for restful sleep.

"Best for you and Baby too."

Age No Bar To Flying

Linbergh Says Properly Trained Pilot Is Always Efficient

Linbergh will be flying as long as he can drive an automobile, he told a group of reporters recently in answer to the query as to whether he intended to take up his flying career as a pilot. "If a pilot grows older, in the opinion of America's foremost pilot, an aviator skilled in youth can fly as long as he can drive a car. I have disposed of the oft-repeated conjecture that he might give up the air as greater responsibilities caused many persons to think that he would be after on the ground."

"I see no reason why I shouldn't," said Colonel Linbergh. "If a pilot has been properly trained he is just as good when he is old as when he was young. I have seen the best pilots in service today are getting along in years."

Canada Week In Glasgow

Prizes Given For Best Display In Grocery Stores

A "Canada Week" was held recently in the city of Glasgow, Scotland, under the patronage of Hon. Lord Provost, Sir David Lindsay. Canadian products were featured throughout the week and attracted great interest among the population. This was the first shopping week to be organized by the Dominion in Glasgow. Cash prizes to the value of \$1,000 were awarded for the best displays of Canadian products in grocery stores. In England, also, Canada Week was observed at John Barker's great London store, where many show windows and a large floor space were devoted to the displaying of Canadian foodstuffs.

A QUICK WAY TO END BABY'S UPSET SPELLS

"Like other young mothers, I worried every time baby cried," says a Syracuse, N.Y., woman. "Several times when she was upset or constipated, I tried castor oil but she couldn't retain it. Our doctor told me to try Fletcher's Castoria because it is harmless and babies like it. That ended my worries and I've used it since for all my children. It never fails to delight mothers by the way it makes them happy. It is a safe, reliable, and pleasant way of getting rid of colic, constipation, colds, etc. That's the reason for its tremendous popularity. Like all good things, it's free for all my children. It's a purely-vegetable product—always bears the Fletcher signature."

Livestock Producers

Eight Provincial Organizations Join Hands To Form One Body

Canadian livestock interests were linked up in a single organization in Winnipeg the other day, when representatives of eight provincial livestock co-operative bodies formed the Canadian Co-operative Livestock Producers, with headquarters in Toronto. D. W. McKay, of Moose Jaw, president of the Saskatchewan Livestock Producers, was elected president; H. B. Clemes, of Toronto, manager of the United Farmers of Ontario, vice-president; and J. K. King, of Moncton, N.B., manager of the Maritime Livestock Marketing Board, travelling secretary.

Satisfied Money Was Safe

A man deposited \$10,000 in a bank. A few weeks later he approached the teller and demanded his money. He was asked if he did not want to leave a small balance. "No," he persisted. "I want my money." So the teller counted out \$10,000. By this time the use of people had collected each one waiting his turn. The man counted the bills very carefully and handed them to the teller.

"Here," he said, "put it back. I only wanted to see if it was all there."

The typewriter is credited to C. L. Sholes, printer editor.

Minard's Liniment—good for tired feet.

Final Production Of Radium

Particles Expelled In Final Analysis Appear To Be Lead

Radium is practically the most expensive product in the world and is valued at approximately \$2,000,000 an ounce. Now hospital authorities are anxious because their stocks of radium are slowly transmuting themselves into one of the commonest and cheapest of metals. At varying rates, which cannot be controlled by any known scientific methods, it expels five particles from its atomic nucleus, and these five particles are atoms of helium, radium is a very heavy element, its atomic weight being 226; helium is one of the lightest of elements, with an atomic weight of 4. Thus the original radium after expelling five helium atoms has an atomic weight of 224—4 x 5, or 208. And 208 is practically the atomic weight of common lead. It seems certain, therefore, that the final product of this rare and costly element is simply lead.

Takes Millions Of Years

It has been recently computed that the most minute objects made visible by the largest telescope are so far away that it takes light, travelling at 186,000 miles per second, 140 million years to span the distance between them and us.

Asthma Doesn't Wear Off Alone

Do not make the mistake of waiting for asthma to wear away by itself. While you are waiting the disease is surely gathering a stronger hold and will be a danger of stronger and yet stronger attacks. Dr. J. D. Kellogg's Asthma Remedy taken early, will prevent incipient condition from becoming chronic and saves hours of awful suffering.

For five cents a tourist can ride for hours around the city of Berlin. A system of transfer makes it possible to change at will from street car, auto bus or subway without paying extra fare.

There is no poisonous ingredient in Holloway's Corn Remover, and it can be used without danger or injury.

Farm Is Best

With grade cows selling for more than \$100 at auction sales, with farm products selling at high prices, this is not the time for young men to be leaving the farm and going to the cities to work for a bare, and often a miserable living.

A town is made beautiful by each one doing his share in fixing up his own property. It is a case of "You up your small corner and I'm mine."

All These Advantages For Farm Construction

Greater Structural Strength

New Improved Edge

Takes Any Decoration

Fire-Proof

Full 3/8" Thickness

For both old and new construction Gyproc gives more advantages than any other material. Makes durable, permanent walls and ceilings in less time and at less cost. Cannot warp, crack, shrink or burn, and is ideal for lining houses, garages, poultry houses, barns, grain bins and all other farm buildings.

Aspirin is a Trademark Registered in Canada

American Fishing Vessels Seized In B. C. Waters By Canadian Patrol Ship

Prince Rupert, B.C.—Seized in Canadian waters by the Canadian government fisheries patrol vessel "Melampus," five American fishing craft were brought into this port Saturday and with the exception of one, which was released, all are being held here pending the outcome of charges that the American craft were within Canadian waters when taken by the "Melampus."

The vessels taken were the salmon trawlers Jeannette, Tacoma, W. May and Puritan. The latter is the one released. They are Seattle craft.

According to the officers of the "Melampus," the American boats, when taken, were going to land in harbor, well within Canadian waters. The fishermen claim they had come in to the harbor to make repairs, claiming they had a right to do so under the treaty between Canada and the United States.

Captain Laird, of the "Melampus," took all the boats into custody, but lay for about five days not far from Goose Island, near Bella Coola, before leaving with the trawlers for this port. Pending instructions from the department of fisheries, at Ottawa, Captain Laird declined to make a statement other than the boats seized were within Canadian coastal waters. At the time but one trawler, the "Atta," could be said to be actually making repairs. It was said, and she was not included in the arrest, being left at Goose Island.

No explanation as to the reason for the release of the "Puritan" was available. On two of the trawlers about two hundred pounds of salmon were found.

Saskatchewan Election Date

Premier Gardiner Announces Nomination Day May 6 and Election June 6

Regina.—Thursday, June 6, is the date set for the Saskatchewan provincial elections. Premier J. G. Gardiner has announced. Nomination day will be Thursday, May 30, when candidates for the 63 provincial ridings will be nominated.

Premier Gardiner will issue a statement on the issues of the campaign some time during the present week.

The elections in the two most northerly ridings of the province and Cumberland will be deferred. Elections in these constituencies are governed by special legislation providing that the proclamation of the returning officers must be posted not less than three weeks prior to nomination day. Difficulties of travel by canoe on the rivers and lakes in these constituencies make it impossible to hold the elections at the same time as in all the other ridings.

Alaskan Survey Planned

Washington, D.C.—Inventory of the vast resources in timber and hydro-electric power that lie beyond inaccessible mountain ranges in southeastern Alaska is to be taken this summer by navy aviators. Flying photographers with multiple lens cameras will unfold the secrets of hidden lakes and inaccessible forests like a magic carpet beneath them.

Oratory Finals

Toronto, Ont.—The Dominion oratory finals will be staged here on May 22, it was announced. Several provincial champions will strive for the right to be Canada's representative at the international oratory championship in Washington on October 28.

Maritimes Grain Rates Case Has Been Again Postponed Until July

Ottawa.—Application of the maritime board of trade for a reduction in grain rates from Port William to St. John, N.B., and Halifax will be heard at three sittings of the board of railway commissioners. Chairman H. A. McCracken and his colleagues on the board, it was announced, will hold local sittings at St. John and Halifax some time in July. Later, a final hearing on the application will take place here.

A rate of 19.34 cents per hundred pounds on grain shipments from Port

Esquimos Will Stand Trial For Murder

Judicial Party Will Have To Make Four Thousand Mile Trip

Edmonton, Alta.—Two Eskimos, now being held at Akivik on criminal charges, are to be tried at that far northern point this summer before His Honor Judge Dubuc, stipendiary magistrate for the Northwest Territories. According to word just received from Ottawa, E. C. Darling will be the crown prosecutor, while Joseph A. Clarke will be counsel for the accused, both having been appointed by the minister of justice.

A charge of murder has been laid against Gleason, an Eskimo who is alleged to have killed another native named Oshuk, at Bathurst Inlet. Lily Skarski will be tried on a charge of infanticide alleged to have been committed at Demarcation Point in the Yukon Territory. Both prisoners will be taken into the custody of the Royal Canadian Mounted Police at Akivik.

Arrangements for the judicial party to leave Edmonton for the far north are being made by the Royal Canadian Mounted Police. It is expected the party will leave here about June 16, in time to take passage on the first trip of S.S. Distriktar after the break-up of ice on the Mackenzie River. The trip will take from six weeks to two months to complete.

Four thousand miles will be covered by the party in making this trip to the Arctic, it being approximately 2,000 miles each way from Edmonton to Akivik.

Cannot Attend Function

Alberta Women Unable To Accept Invitation From England

Edmonton.—None of the five Alberta women who were expected to visit England on June 17, when the Privy Council is to hear their appeal against the decision of the Supreme Court of Canada, which decision declared that they are not "persons" within the meaning of their national charter, the British North America Act, will be able to attend a great public function to be held in their honor in London.

The invitation, which also carried with it an offer of assistance, has been tendered by a group of women in Great Britain, including members of the imperial parliament and other notables who have achieved by the women's cause, business, professions, literature, education and social endeavor.

The Alberta appellants are Mrs. Henrietta Edwards, Mrs. Nellie McChung, Mrs. Louise McKenney, Hon. Irene Farley, and Magistrate Emily Murphy.

Most Complete Line

Ottawa.—In a judgment handed down the Board of Railway Commissioners ordered the Canadian National Railway Company to complete the construction of a branch line in connection with the operations of the Geco Coal Company, Ltd., in the Rocky Mountain field reserve, in Alberta.

New York Doctor Loses Radium

New York, N.Y.—Somewhere in New York, \$50,000 worth of radium is wandering slowly through its tiny containers and threatening harm to anyone who touches it. It was lost by Dr. J. J. Eder, a skin specialist, who believes he left it in a taxi-car.

Riots Cause Controversy

Part Played By Police In Berlin Riotous Is Criticized

Berlin, Germany.—Bitter controversies continue in the Berlin press and among the public as to the part played by the police in suppressing the Communist riots which broke out on May day. Post-mortem examinations of twenty-four victims of the riot are said to have revealed that 17 had been killed by police bullets.

The official inquiry has been unable to establish that a single shot had been fired by a civilian against the police. Only one policeman of the 40-odd injured had received a bullet wound and that wound he had accidentally inflicted upon himself.

Hundred and fifty shopkeepers of the Wedding district, where rioting was most serious, declared that the streets were quite safe from Communist excesses and that a simple police patrol would have sufficed.

Meanwhile, 45 persons of 117 arrested had been sentenced to short terms of imprisonment for breaking the peace. The rest were released for want of evidence.

Heads Victorian

Nursing Order

Hon. Geo. P. Graham Re-Elected President Of Board Of Governors

Ottawa.—Right Hon. George P. Graham, was re-elected president of the Board of Governors of the Victorian Order of Nurses for Canada at the concluding session of the thirty-first annual meeting of the order here. Hon. W. K. Malkin, of Vancouver, is one of the four vice-presidents.

Tribute was paid to Mrs. James MacCauley, of Vancouver, and Mrs. William Dench, of Halifax, as "the two splendid women with whom the idea of the V.O.N. first originated." Letters of gratitude and congratulations were sent from the conference to Mrs. MacCauley and Mrs. Dench.

Miss Elizabeth Smellie, chief superintendent of the order, gave a comprehensive resume of the work during the past year. Victorian Order Nurses attended 62,281 patients and made 519,166 visits, an increase of 51,666 over the preceding year. Of these 45,974 were free nursing visits.

Fifty Airplanes Will

Compete For Prize

All Types Entered In Race From Mount To Moose Jaw

Moose Jaw.—Fifty aeroplanes, of all types, speeds and sizes, the largest number that have ever flown across the international boundary, are to take part in a race from Mount, N.B., to Moose Jaw, a body, will fly from Mount, N.B., on June 5. The race is to be organized by the Moose Jaw Flying Club, and will be staged in connection with the monster aerial derby from Tulsa, Oklahoma, to Calgary, Alberta, which has been organized by Calgary Aero Club. The aerial derby is for a prize of \$15,000.

Fails In Altitude Test

Montreal.—After reaching a height of 17,000 feet, Captain M. E. Jones' chief pilot of the Curtiss-Robt airplane at Cartersville, was forced to give up his attempt to break the world's altitude record. Jones made his attempt without the aid of oxygen and in an open cockpit plane.

Falls From Flagpole

Toronto.—Toronto's best known "dizzy height" painter, William McMillan, aged 62, was killed when the end of a 46-foot flagpole snapped, hurling him to the roof of a downtown business building.

A BROWN STUDY

Drawn is a more restful and tasteful color, the car designers and interior decorators of the Canadian Pacific Railway have decided, so this will be the predominant note in the sumptuous new sleepers just built by the company's Angus shops at Montreal especially for service on the Trans-Canada Limited. The carpets and curtains will be a rich brown, and the wood inlaid a lustrous walnut. Permanent headboards, will give added privacy, dividing each section from its neighbor by velvet curtains. The texture of the rear end equipment on the Trans-Canada will be a substantial, doming car, with green-tinted linoleum, vitreous-glazed sun rooms and smoking rooms for women as for men.

SPOKESMAN FOR GERMANY

Dr. Hjalmar Schacht, president of the Reichsbank, and spokesman of the reparations conference in Paris.

Suspect-Grain Mixing

Think United States Soft Wheat Is Mixed With Hard Wheat Of Canada

Vancouver.—Possibility that some United States soft wheat is brought to the port and mixed with Canadian grain, is interesting the Saskatchewan Royal Grain Commission just now. Evidence has been produced that at least one such vessel from Seattle was in port, this spring, with a part cargo of soft wheat, and loaded the balance of the ship with Canadian grain. The port warden was before the commission, to explain just what safeguards there are to prevent anything of this sort. His evidence was clear on the point, that in such an event, no government certificate would be issued to cover such a mixed cargo, but that there was nothing to prevent mixing after the Canadian grain had been inspected into the vessel. In such an event, however, the Canadian certificate could not be commensurate in certifying to such a mixture, though overseas buyers might be deceived as to just what kind of cargo they were buying.

It was pointed out that ships en route to the Orient from Seattle, frequently come in here for grain, and that grain of the soft American grain aboard. There is a mixture made in Oriental ports of 35 per cent. Canadian hard wheat, and the balance soft, from the United States, but this is not covered by a Canadian certificate.

To Circle The Globe

Plans Being Drawn Up For Graf Zeppelin To Make Flight Around The World

Washington, D.C.—The post office department was advised by U.S. diplomatic officers in Germany that plans are being made for the Graf Zeppelin similarly to make a round-the-world trip, starting and ending at Lakehurst, N.J.

A trip from Germany to the United States and back is due to start soon, after which the post office department was advised the airship would return to this country to start circling the globe.

Wheat Nipped By Frost

Grain In Brandon District Will Grow Again Say Farmers

Brandon, Man.—Wheat shoots on thousands of acres in the Brandon district have been nipped off by a one-night frost. Grain that had been reached a height of one and one-half inches has been leveled. Farmers state that the grain will grow again without re-seeding and some contend that the new growth will be a benefit, strengthening the roots.

Distress Freight Rate

St. John, N.B.—A distress freight rate for potatoes, of \$1.21 per hundred pounds, from the Maritime Provinces to points in British Columbia, is effective from May 10 to June 20. Huge stocks of potatoes are still on hand in the Maritimes.

Given New Past

London, Eng.—Admiral Sir Herbert Brand, commander-in-chief of the Atlantic fleet since 1927, has been appointed commander-in-chief of the Plymouth station, Sir Thibault, who has his flag in the new battleship Nelson, is now 59 years of age.

Present Wheat Situation Was Foreseen By The Pool Officials

Form Chamber Of Commerce

Canadian Firms Interested In Aviation Seek Incorporation From Government

Montreal.—With the rapid development of aviation in this country, a number of firms from Toronto, Winnipeg, Montreal and other points, practically interested in the subject have decided to form an association for their mutual protection under the title of "Canadian Aeronautical Chamber of Commerce." Following a meeting here attended by thirty-five air craft and accessories representatives, a series of by-laws have been tentatively prepared.

Steps are now being taken to obtain government approval of the body and to seek incorporation.

In a statement issued the objects of the chamber were set out in part as follows: "To foster, advance and promote trade and commerce throughout Canada and foreign countries in the interest of those persons, firms or corporations engaged in the business of manufacturing, buying, selling, dealing in and operating air craft, air parts, air engines, motors, air craft parts and accessories of every kind and description. To provide uniformity and certainty in the customs and usages of trade and commerce among its members."

Chas. Hunter, of the Western Canadian Airways, Winnipeg, represented western interests at the conference.

Eclipse Of Sun In South Seas

Thousands In Manila See Phenomenon Through Smoked Glasses

Manila.—The eclipse of the sun cast a shadowy streak across Polynesia and the South Seas. Manila witnessed the phenomenon with great interest, as seen here, 90 per cent. of the face of the sun being obscured as the moon's bulk came between the solar rays and the earth. The observation cast a spell over the city but did not prevent the sun from casting shadows.

If the natives feared the phenomenon there was no sign of it here. Thousands of people, where five scientific expeditions located their instruments to view the phenomenon of a total eclipse.

Marooned Trains Released

Were Held Up During Ten-Day Blizzard In Northern Manitoba

Winnipeg.—Freed from northern snows by a let up in low temperatures, two Canadian National Railway trains were free to proceed on the way to Churchill, the prairie outlet on Hudson Bay. Both trains were held up during a ten-day blizzard that had swiftness down from the northland almost to the Pas.

After days of almost unrelenting effort the snow plows succeeded in battling through the trains, on one of which was the train en route to Churchill for the department of railways and canals.

Reparations Plan Would Be Unfair To The Dominions

Paris.—It was contended that the plan for revision of reparations payments, suggested by Germany, proposed by French D. Young, of the United States, at the reparations conference, would leave Great Britain nothing for the Dominions or for arrears of interest on debt, it would amount that the country just enough from Germany to pay the U.S. from now on.

The British experts here note the contention that this is all that is demanded in the Balfour note. It is pointed out the note excludes reparations due the Dominions from the U.S. The absence of direct representation for the Dominions at the con-

Winnipeg—Wheat congestion on

the eastern seaboard is not the result of any action by the Canadian Wheat Pool, contends a report issued by E. B. Ramsay, general manager of the Central Selling Agency of the Canadian Wheat Pool.

"Our view of the situation is that the supposed wheat surplus is more apparent than real," says the Ramsay report. Figures are quoted at length to uphold the opinion, and comment is included that "the United States have thoroughly advertised that they have a large surplus of wheat which they do not know what to do with."

The present situation was anticipated by Pool officials, the report states, giving the anticipation as reason for the quite conservative spring interest payments.

Stating that the Pool feels no anxiety over its present stock of wheat, it is not in financial difficulty, Mr. Ramsay labels comment in the market reports as to Pool operations as "95 per cent. pure surmise."

Further, Mr. Ramsay says that no one of the organization's officials has been asked to having and denies that a high official of the pool has been recalled from Europe for the purpose of discussing the situation.

Plans Flight To Sweden

Second Attempt Will Be Made By U.S. Aviator

Chicago.—Another flight to Sweden from the Middle West is being planned by Bert Haskell, Rockford, Ill., aviator.

Haskell, who piloted the "Greater Rockford" on its projected Rockford-Sweden flight last summer, and was forced down in the snow fields of Greenland, declared his next flight would be a return flight with nine refueling points.

Haskell predicted that within five years aeroplanes with "pay loads" will fly regularly between Copenhagen and Chicago. The route from the Middle West northward through Canada to Iceland and Greenland, thence to the European mainland, is the safest possible to Europe, he said, with its longest stretch over water being only six hundred miles.

Wheat Nipped By Frost

Grain In Brandon District Will Grow Again Say Farmers

Brandon, Man.—Wheat shoots on thousands of acres in the Brandon district have been nipped off by a one-night frost. Grain that had been reached a height of one and one-half inches has been leveled. Farmers state that the grain will grow again without re-seeding and some contend that the new growth will be a benefit, strengthening the roots.

Given New Past

London, Eng.—Admiral Sir Herbert Brand, commander-in-chief of the Atlantic fleet since 1927, has been appointed commander-in-chief of the Plymouth station, Sir Thibault, who has his flag in the new battleship Nelson, is now 59 years of age.

Reparations Plan Would Be Unfair To The Dominions

Paris.—It was contended that the plan for revision of reparations payments, suggested by Germany, proposed by French D. Young, of the United States, at the reparations conference, would leave Great Britain nothing for the Dominions or for arrears of interest on debt, it would amount that the country just enough from Germany to pay the U.S. from now on.

The British experts here note the contention that this is all that is demanded in the Balfour note. It is pointed out the note excludes reparations due the Dominions from the U.S. The absence of direct representation for the Dominions at the con-

ference is considered by the British delegation as all the greater reason for not yielding on the question of the Dominions share of German reparations. The delegation is practically certain to reject that plan of the Young proposals which would reduce the German payments to the Dominions to zero.

The proposal forwarded by the U.S. delegate were by way of a compromise after the conference had been adjourned. It was the amount Germany should pay. The Germans refused to meet the Allied demands and Mr. Young advanced a plan involving some reduction.

Predicts Doubling The Wheat Yield

Can Be Accomplished Through Sub-
solar Dusing For Next Six Years

Doubling the yield of wheat per acre in America within 10 years is predicted by H. H. Whetzel, professor of plant pathology at Cornell University.

This will be done he says, through application of a recently developed method for wiping the rust parasites from wheat by sulphur dusting.

Stem or heat of wheat, like its namesake in steel, is an insidious scourge. It is a microscopic fungus, visible only as a slight discoloration. How devastating its effects have been was insured fully only when experimental fields were protected successfully from rust.

In Manitoba, Professor Whetzel says, sulphur dusted wheat produced 40 to 50 bushels an acre, against yields of 10 to 15 bushels from plots unprotected against rust.

Leaf rust of wheat, long known in southern grain areas, has not been considered a special hazard. But experimental sulphur dusting, Professor Whetzel says, revealed that this form of rust regularly reduced crops by about 20 to 30 per cent.

The sulphur dusting method has been under experimental development for several years in areas presenting different kinds of wheat growing conditions.

The pathologist foresees power machines dusting wheat 50 feet wide in future grain fields. He believes it will take a decade to put over the cereal dusting, but that the enormous profits will insure success and pay the bills besides. Two or three dustings a season are sufficient he says, when they are timed properly.

Trees For Windbreaks

Wide Spacing In Planting Permits
Horse Drawn Cultivation

Many varieties of trees are proving suitable for windbreaks in the Prairie Provinces. At Swift Current, Saskatchewan, nineteen varieties are classed as ornamental. In the report of the superintendent published by the Department of Agriculture, at Ottawa, it is shown that thirteen of the varieties tested have withstood winter temperatures without any killing whatever. These include Canadian Maple, Siberian Fir, Tree Woody Caragana, at Swift Current, Villosa Lilac, Tartarian and other Honeycreepers, Missouri Currant, Siberian Dogwood, and others. Planting about eight feet apart under the conditions is recommended by the superintendent of the station. This method, he states, allows access for horse-drawn cultivation for a longer period of time than is permissible by closer spacing. This is a matter of much importance, because it facilitates weed control. Such trees as poplars, elm, maple, ash, spruce, and Scotch and Jack pine do remarkably well. Poplar plantations cuttings in four years had reached heights of from fifteen to twenty feet.

Presented With Flag

The flag of Bermuda was presented to the R.N.S. "Lady Somers" of the Canadian National Steamships, when she called at Hamilton on her maiden trip this month. Admiral Somers founded the colony of Bermuda in 1609. In presenting the flag, the president of the Bermuda Chamber of Commerce said this fleet of ships was proving the salvation of the agricultural industry of the island.

Prof. Gray: "What is the action of belladonna against the cerebellum?"
Barnes: "I know that they were using each other!"

"Talking about babies, my mother has told me, that when she was born she weighed less than three pounds."
"By jove, how awfully interesting, what? And, er, did she live?"

"I have been told, that when she was born she weighed less than three pounds."
"By jove, how awfully interesting, what? And, er, did she live?"

"I have been told, that when she was born she weighed less than three pounds."
"By jove, how awfully interesting, what? And, er, did she live?"

"I have been told, that when she was born she weighed less than three pounds."
"By jove, how awfully interesting, what? And, er, did she live?"

Disadvantage Of Large Cities

Neighborhood Is Pleasure People
Have To Do Without

Life in the big cities has its attractions, but neighborhood, even among people who live in adjoining houses isn't one of them. The other side of an automobile was left parked in one of the residential sections of Detroit for four days. People passed to and fro, never thinking it odd that the car didn't drive off. The property—or if they did think of it, they didn't bother about it. Finally a policeman investigated and found that the car contained the latest body of a woman. The murderer merely disposed of the body by leaving it in the abandoned car, which turned out to be the easiest way to get rid of it without detection. It might have been there yet had the policeman not come along.

People in most big cities do not know and do not care who their neighbors are. They just go about minding their own business and expecting others to do the same. Sometimes it isn't safe or desirable to be so inquisitive, they drop the idea of becoming acquainted. But they are thus missing one of the most coveted pleasures of life—minding their own business and expecting others to do the same. In the smaller cities is enhanced by the ability to know and see one's neighbors, and to enjoy their company. That is why a small city is the most ideal place of residence. One can have neighbors, and get the most sociability out of life. Life without neighborhood would be unbearable to anyone who has become acquainted with the joy it puts into human existence.

Sweet Clover

Seven Varieties Tested At Swift Current Experimental Station

There are several varieties of sweet clover grown in the Prairie Provinces for fodder purposes. At the Swift Current Experimental Station seven varieties were grown side by side. None of these gave very heavy yields, but all of them made fairly good stands when sown alone on fallow ground. The variety Bourne yielded a yield of 1.85 tons per acre in 1927, and 1.28 tons as the average crop for three years in successive years. A variety called Dwarf, growing to a height of only 15 inches, gave practically a ton and a half of hay to the acre as a three year average. Common White, that reached 28 inches high, yielded practically the same tonnage. Grassy County, tested only for two years, gave a lower yield of about a ton and a third. Macer yielded 1.20 tons and Arctic 1.19 tons as an average for three years. These results are given in the report of the superintendent of the Swift Current Experimental Station, published by the Department of Agriculture, at Ottawa.

The Value Of Resistance

If Things Were Made Easy Development Would Be Retarded

No doubt a world in which matter never got out of place and became dirt, in which iron had no flaws and wood no cracks, in which gardens had no weeds and food grew ready cooked, in which clothes never wore out and washing was as easy as advertisements describe it, in which the right word was not hard to find and rules had no exceptions, and things never went wrong, would be a much easier place to live in. But for purposes of training and development it would be worth nothing at all. It is the resistance that we use on our matter; it is the conquest of the resistant stuff that educates the worker. I wish you enough difficulties to try you well and make you strong and skilful. Henry Van Dyke.

Out Of His Line

Bouncing nervously through Harlem, a strident exhorter on this conversation between two colored preachers. "Where you all preaching now, brother?" "Nowhere, we are the suaver." "A fine preacher like you is, too," said the first. "That's not it," retorted the other. "I'm a preacher, but I want that last congregation wanted was a praisin' preacher and that ain't my line. Seems like they're too much specification nowadays."

"The man is no honest he would not steal a pin," said the minister friend.

"I never thought much of the pin that belonged to Miss Cayenne. 'Tis him with an umbrella."

Cream For Buttermaking

Should Be Stored In Deep Pails,
Standing In Ice Water

The place and method of storing cream bears a close relationship to the quality of the butter from which it is made. The practice of holding the cream in cellars is not the best, according to pamphlet No. 37, of the Department of Agriculture, at Ottawa. The Care Of Cream For Buttermaking, Experiment Station carried on by the Dairy Branch and referred to in this pamphlet, proved that cream can not be kept sweet for thirty-six hours, or for delivery every other day in the ordinary farm house cellar. It was also learned that cream left uncovered in the cellar has a tendency to develop an objectionable flavour which shows up clearly in the butter. A much better way of keeping the cream is to store it in deep pails standing in ice water. Even though the temperature of the water is not below 45 degrees, the cream keeps much better under the water system, the difference being principally in the rate at which it sours. In a heavy tank when kept for thirty-six hours in a water-cooled tank with the cream at 52.5 degrees, the percentage of acidity was kept for the same length of time in a cellar at 64.5 degrees, the percentage of acidity was 47. This shows that the cream from the cellar had three times as much acidity as that cooled in ice water. Indeed, when kept for sixty hours in the ice water at 52 degrees the percentage of acidity had reached only 163. The ice water cooling is especially desirable when cream cannot be delivered to the creamery often than twice a week. In such a case the temperature of the cream must be kept down to forty-eight if the cream is to be delivered in a satisfactory condition. Frequent deliveries of the cream are desirable even when the best system of storage is used. Keeping the cream for longer than two days at the farm has a tendency to make it sour, and the old cream favour so common in gathered cream butter.

Minute Calculations

Seattle Chemist Finds Elastic Scales
An Interesting Thing

A Seattle chemist who recently purchased an up-to-date and very delicate set of scales has worked out some interesting problems with his latest phything. "A strand of human hair, he states, long enough to encircle the world at the equator, would weigh 729 pounds.

The ordinary domestic variety of pin weighs .024785 ounce. The ordinary 2-cent postage stamp is lighter than the air mail stamp, the weights respectively being .0129724 ounce and .0566 ounce. The ordinary half-cent stamp weighs .00902 grams or .0000768 ounces.

Can you see quite well, darling? Yes, dear, thank you.
No one in the way?
No, dear.
Then change places with me.

Jack (over the phone): "And please mail my ring back to me."
Jacqueline: "You'd better come and get it; glass breaks so easily in the mail."

OBJECT OF HISTORY

This piece of stone from the ruins of Port Prince of Wales, opposite Churchill, is the first authentic piece of freight shipped over the Hudson Bay Railway from Churchill to Winnipeg. It was presented by W. G. Chambers, freight traffic manager of the Hudson Bay Railway, to the Board of Trade of Winnipeg on the occasion of the 50th anniversary celebration of that body on April 20th. The president of the Board of Trade was asked to sign the freight delivery sheet for the stone, which will be suitably engraved and placed in the museum of the Board of Trade.

Port Prince of Wales was, in its time, one of the strongest ports on the continent. It was begun in 1733, completed in 1747, and demolished in 1792. It had 46 cannon, of which 33 lie among the ruins. The site of the fort is directly across the harbor from Churchill—Photograph Canadian National Railways.

Hatching Chicks In Old Fashioned Way

Poultry Husbandman Uses Modern
Hints On How To Obtain Best Results

When chicks are to be hatched by the natural method it is well to set several hens at once. As the eggs are tested from time to time and the fertile eggs removed, those remaining can be given to fewer hens. Then when the chicks hatch the hen will be able to brood a larger flock of the same age. When this system is used the hens from which the eggs have been taken may be re-set and kept going for several weeks. F. C. Eklund, the Dominion Poultry Husbandman, recommends thoroughly dusting the hen with sulphur or insect powder before she is set. The nest should be made ready and the hen placed on the eggs, preferably after dark. To test the hen as a brooder it is well to give her a few common eggs for a few days and if still inclined to set she may be given a setting of from 15 to 18 eggs, according to size. It is important to see that the nest is perfectly clean and disinfected before allowing the hen into it. It is regarded as a good practice to set the hens where the laying stalk cannot get to them, a colony house makes an ideal place for this purpose. There should be kept near at hand a constant supply of fresh water and hard grain. The hen should be fed in a hopper as well as green feed. Some hens do not set as well as others and Mr. Eklund remarks that sometimes a hen will continue to hatch eggs at work for several weeks. This may be done by removing the eggs six or seven hours before they are hatched. If they continue to set well and keep in good flesh it may be possible to keep them at work for several weeks. The hen should be fed with chicks or putting them back into the laying pen.

Saskatchewan Egg Pool

Quantity Marketed Through Pool
Had Cash Value \$300,000

Last Year
Eggs to the number of 1,498,183 dozens, of a cash value of \$400,000, were marketed through the Saskatchewan Egg and Poultry Pool during the past year and the prices paid were the highest average prices ever paid by the Pool, said Mr. John Holmes Aquil, president of the Pool, in his annual report to the delegates. Mr. Holmes said that direct shippers netted 23.5 cents for extras; 23.0 cents for firsts; 19.6 for seconds; and 15.5 for cracked eggs, which prices were regarded by members as being very satisfactory.

Phyllis (yawning): "Well, what shall we do this evening?"
Ally: "Let's think hard."
"No, let's do something you can do, too."

Mistress: "And why did you leave your last place?"
The Cook: "I was so far away my husband had to take a taxi to eat with me."

London Taxidriers Are Very Reliable

Know Metropolis By Heart and Take
Shortest Possible Route

The taxidriers of London may be less numerous than the Parisian variety, but they are none the less typical of their own city. Many of them are old men, veterans of the horse-drawn "grove" cabs, who seem to have advanced in years a bit more gracefully than their counterparts. A visitor taking his first ride in a mechanically driven motor-carriage will swear that he is riding in the original taxicab. Nobody seems to know the age of a London taxi, but it would be safe to classify most of them among the more mature motorists. They are probably as comfortable as any cabs in the world. The passenger sinks to unbelievable depths in the back seat, pushing down the folding seat for foot-rest, and is kept awake by the rattle of the window panes. The driver honks the horn continually, an almost sacred rite in the London traffic. Occasionally he engages in heated conversation with the pilot of a bus who is fortified behind the extension of the motorist hood like an ancient warrior sheltered behind a shield. Most of the taxidriers know the city and suburbs by heart. The majority will follow the same route between any two points in London, and the route usually avoids traffic delays and the most horrid journey to your destination.

No Substitute For Walking

Physicians Agree That No Better
Exercise Is Known

No physician has ever found any substitute for walking as a means of habitual walking in the open air, it may be said, no physical culture professor. These men who move the motorist hood like an ancient warrior sheltered behind a shield, devote every ingenuity to avoiding a few steps during the day, and fold their arms, and the day in and day out, are going to do so, and they would if they used their feet regularly for walks in the open air. The benefits of walking are physical and physical effects of walking and by walking is meant swinging along with a thrust behind the step and not merely dawdling—that jumps a man fit in 20s, 60s, 70s and 80s. Nature did not give man legs as a means of locomotion in the case of ladies. Legs are made to use. Neglect to use them exacts a severe penalty. Many a woman who neglects to use her legs in her daily life, thinks he has exercised would be in a better condition today if he walked a few miles a night and a day, and there are times for taxidriers to be driving. There are times when "make time" with them, but do not cut out walking, thinking that is so valuable to health.

Opening Last Frontier

Aviation Has Helped To Speed Up
Work of Canada

The northern part of Canada is the vastest unexplored territory in the world. The opening contacts with the development of flying. Aeroplanes have been successfully used for aerial surveys, for exploring, for first aid, for transport, and new regions are being opened with rapidity that would have been unthinkable in the old days of canoes and dog-trains. In the process Canadian flyers have shown themselves astonishingly adept in developing new uses for "planes, and in the utilization side of flying. They have made splendid progress in overcoming the difficulties of winter flying, and deserve great commendation for breaking into what too many people, including Canada, have hitherto regarded as the frozen North. The conquest of the last frontier is being made by air.

Birds In The Making

Two actors met after a long interval.

"What have you been doing lately?"

"Well, as a matter of fact I've left the stage," replied the other.

"But what made you do that?"

"Well, I had a hint that I was not suited to it."

"Oh, I see," said his friend: "the little birds told you, eh?"

"Well, no, exactly, but they might have become little birds if they had been allowed to hatch."

League Doing Great Work

The League is a fact, and perhaps the greatest fact in the world of today. Already it has prevented war. It has saved lives and repaired wounds. It has the nation as society binds individuals, yet leaves them true liberty. The League has done great work and will, with the support of all the people who make up the nations, do more.

"Preventor Of Ills" Doctor Of Future

Opinion Expressed By One Of World's
Greatest Surgeons

"Preventive medicine will be the supreme human science of this century," one of the world's greatest surgeons, Sir William Arbuthnot Lane, predicted during an interview at his Mayfair residence. The conversation ran mainly on two subjects: (1) the value of natural sunlight and, in many cases, of ultraviolet rays in connection with the prevention and cure of disease; (2) the importance of dieting in relation to life longevity.

"Man needs a certain amount of sunlight. And where he cannot afford the expense of travelling to places where the sun shines, then in many cases the so-called 'artificial sunlight,' or ultra-violet rays, offer an excellent substitute."

He added: "But people hate new things."

Emphasizing the importance of preventive medicine, Sir Arbuthnot read aloud an extract from an article of his in "The Golden Health News," a new medical magazine, in magazine form which the great surgeon has just founded: "The underlying conception of this work," he said, "is that good health can be attained and preserved by ascertained principles of living. It is not a close secret of the medical profession, nor is it to be found in specific and prescriptions. Modern civilization is obsessed by the disease complex, and medicine which is dominated at least as much as other professions by the state of public opinion, is unable to think itself away from that false and injurious attitude toward its function. The physician as 'healer' still carries the strongest popular conception. Yet it cannot be denied that it is the physician as 'preventer of ills' who will be the doctor of the future."

Exchange Farms

Three Agricultural Students From
Germany Placed On Western

Under an arrangement between the colonization department of the Canadian National Railways and the German National Cooperative Association, three young men from Germany have been placed on large farms in western Canada. Three others were also placed in eastern Canada. All of the young men are graduates of agricultural institutions in Germany. After working on the land until after the harvest they can, if they wish, attend an agricultural college for the balance of the year they will spend in Canada or they can remain on the farm for the full period.

Ship Eggs To California

Record Shipment Of 30,000 Eggs
Sent To U.S. from British
Columbia

A record shipment of pedigreed White Leghorn hatching eggs was made recently by the Poultry Breeders' Association of British Columbia to a buyer in California. The shipment consisted of 30,000 eggs, valued at \$5,000.

The British Columbia eggs, which were all laid by pedigreed stock, will, it is understood, be used to obtain pedigreed cockerels for distribution among the poultry farms in California supplying eggs to the hatchery.

One of the Audience: "I've heard that you women who go around telling others how to raise children neglect your own."

Lecky: "I'm a mother. I never had any children."

Lawyer: And what grounds have you got for a divorce, madam?"

Film Actress (hopefully): "Well, I've got a husband."

"Why do you want a job where the office is open on Sundays?"

"I get my pay—I am busy all the week," Pages Gates, Verdun.

"Why do you want a job where the office is open on Sundays?"

"I get my pay—I am busy all the week," Pages Gates, Verdun.

British Admiralty Has Brought To Perfection An Electrically Controlled Torpedo

After several years of experimenting with a new type of electrically controlled torpedo, the British admiralty has brought to perfection a projectile which follows the target and carries sufficient explosive to blow the vessel in two when it scores a direct hit, according to reports heard today.

In a test on the admiralty range in Portsmouth harbor, one of the torpedoes got out of control and tore around the harbor at 40 knots. Fast admiralty vessels chased it but they could not overtake it and finally the torpedo landed at Weymouth beach.

Speculators were not allowed to approach within 100 yards of the mysterious projectile and photographs taken by the several present were confiscated for fear that one of the torpedo's mechanism might be revealed.

The torpedo is not fired like an ordinary torpedo but is launched into the water. Thus the vessel that is carrying it is able to hide in view and destroy the target with these electrically guided torpedoes without revealing the torpedo carrier's position by an explosion. Once launched, the torpedo is steered by a small wireless apparatus looking like two-tube anemometer.

The first current applied starts the powerful driving mechanism at the back of the projectile. As it travels forward, a fine copper wire in the torpedo is pulled out by the wind behind it apparently acting as a sort of aerial. A second wave current controls the steering apparatus which gives remarkably correct enablings the torpedo to follow all the twists and turns of the target. A fine antenna to that of an aeroplane, the operator has the choice of launching the torpedo over the surface of the water at a tremendous speed or of submerging it several feet in order to make it hit below the water line.

The tests produced amazing results. Several old vessels were towed out to sea and a torpedo launched many miles away from them. In every case the torpedo was 11 seconds of this kind, a direct hit was scored by the operator who was able to guide the torpedo to within a few feet of the spot aimed at.

The torpedo contains a new and deadly explosive of such strength that several of the target ships were cut in half.

The Weymouth mishap occurred when the control instrument burst a tube and left the operator with no guide the torpedo in one direction only. Hence the projectile made ever widening circles until it was grounded.

The explosion of the torpedo had caused by the contact of four detonators, two on the head and one on each side. The explosion occurred immediately when any of these come in contact with hard objects.

The Explanation

On this trip the crack express had been far from living up to its reputation. First it would go forward fifty yards or so, then back, then stand still, puffing uncertainly, and then begin the same thing all over again. At last one of the travellers lost his patience and summoned the porter.

"What's the matter with this train?" he exploded. "Back and forth and jerking forward in this awful way."

"It's quite all right, sir," the porter answered him in that soothing way that porters have. "I think the engineer is teaching his horse to drive."

"Do you see that man through the window? He hasn't moved for twenty-four hours. He can't be asleep; he must be dead. I am going to call the police."

"Oh, it's all right. There's a chess tournament going on in there."

"I have killed five flies, two mosquitoes and three fleas today."

"How do you know that?"

"Two were on the table and three on the looking-glass."—H. Travers, Rome.

W. N. U. 1785

Make Milling Test

Garnet Wheat Found To Be Inferior To Marquis For High Grade Flour

In color, volume of loaf and gluten-content, Garnet wheat is inferior to Marquis, though the two varieties show no appreciable difference in absorption and bread yield, according to the result of a test, completed at the Keweenaw Mill of the Lake of the Woods Milling Co.

"If a high quality of flour is to be a first consideration," states the report of the company's investigators, "we cannot recommend Garnet for our mills. The result of this test further confirms our previous convictions."

To stage the experiment, which gave results in accord with previous tests, a mix of 2000 bushels of Garnet wheat was milled in comparison with Marquis on a commercial basis. "An excellent sample of Garnet was used in the test, weighing 65½ pounds per bushel and averaging 12.2 per cent. protein; the Marquis sample weighed 62½ pounds per bushel and averaged 13.2 per cent.

Regarding reward which the company's test states, the variety is consistently from one to two per cent. higher in protein than Marquis and equal to Marquis in all the best baking points. Hope was expressed in the report that agronomical success in producing Reward might in the near future enable it to replace all other varieties."

Fighting Dealers In Narcotics

Addicts In Egypt Spend \$25,000,000 Annually On Drugs

The extent to which the drug traffic is ravaging Egypt may be gathered from a statement by Colonel Russell Pasha, English head of the narcotics bureau recently established.

He declares that the number of Egyptians who habitually take drugs is estimated at more than 500,000 in a population of 15,000,000 including the troops and considers that \$25,000,000 is spent annually on the purchase of narcotics.

The bureau is engaged in a stern fight against the dealers in narcotics. One member of the gang recently tracked down in Vienna is reported to have netted \$80,000 during the last two years from the drug traffic.

Three Years Making Table

Ohio Man Took 1,507 Pieces Of Wood But No Nails

Three years of tireless effort have made Burton W. Blair, Huron, Ohio, the possessor of a library table that is considered a work of art.

Without the use of a single nail or screw, Blair has constructed a table that many antique collectors would like to own.

The top is constructed of 1,507 pieces of wood, 17 different kinds being used to give the desired color effect.

Attractive in its simplicity, the unique table contains three designs, the Masonic square and compass, composed of 62 pieces of wood, and the American legion emblem.

Blair is a World War veteran. He began work on his table October 5, 1925.

Girl Best Cattle Raiser

Twelve-Year-Old Annie Turner Is Champion Of British Columbia

This year's champion cattle raiser in British Columbia is little Annie Turner, twelve-year-old daughter of James Turner, Cultus, B. C. stock breeder. Her 14-month-old Short-horn steer, sired by Brindall Marquis and weighing around 1,100 pounds, won the grand championship of all breeds at the Kamloops fall sale and fat stock show.

Prize-winning trophies for live stock is no novelty for Annie Turner. She won high honors last year and this year she repeated her triumph with cups and other trophies.

Must Be Perfect

The optical glass used in an astronomical telescope must be free from imperfections and internal strain. In the polishing operation only a few ten-thousandths parts of an inch of glass are removed. Errors of a millionth of an inch in the surface curve must be detected and remedied.

Prince Albert National Park

Prince Albert National Park, in northern Saskatchewan, has an elevation of 1,800 feet above sea level and contains many lakes and streams which form the beginnings of canoe routes leading both to Hudson Bay and to the Arctic Ocean.

Canada has no leisure class. Those who have no business to attend to are busy at bonapais in the winter and at golf in the summer. Those out of work keep busy watching the sky-scrapers rise.

Strong For Daylight Saving

Twenty-Five Million In States Will Live Under It This Summer

The Merchants' Association of New York announced recently it had completed a survey showing that 25,000,000 persons in the United States will live under daylight saving time this summer.

While a few of the smaller cities and towns have discussed the practice since last survey was made two years ago, the association said the latest inquiry shows the movement on the whole is growing.

A bill authorizing daylight saving is now pending in California; Massachusetts has a statewide daylight saving law; the whole state of Rhode Island will be on daylight saving by virtue of numerous local ordinances; and virtually the entire state of New Jersey will observe the new time.

In New York State 186 cities and villages set clocks ahead, and 33 communities in Connecticut will again adopt the plan. Chicago and eight other cities in Illinois and six cities in Indiana are among other places to adopt the scheme.

Canadian Ice Cream For South Americans

Shipment Goes Forward To Georgetown, British Guiana, By C. N. Steamship

The first shipment of ice cream, which it is believed was ever made to South America from any place in Canada, went forward recently from Toronto, N. S. consigned to Georgetown, British Guiana, by the R.N.S. "Lady Drake" of the Canadian National Steamships. The order, which has been forwarded to the manufacturer entirely unsolicited, and the manager of the firm forward the great satisfaction in this trade with the inauguration of the new service by the Canadian National Steamships.

Two years ago they made their first shipment of this delicacy outside of Canada to Newfoundland, and this has since developed into a regular trade. Convinced by their success in Newfoundland, the firm decided to extend the export field with the results as noted.

Decline Of Chivalry

Knighthood Appears To Be No Longer In Favor

It was bound to come. Woman, having every field of male activity, insisting that complete equality between the sexes should be demonstrated beyond dispute, now insists the absence of qualities of which she has deprived the other sex is the process of competing with them. A correspondent who writes to the Times lamenting the lack of chivalry in modern society suggests that women should create a demand for those graces in their own friends which former generations classified as "knight-errantry." But knightliness here at any rate is no longer in flower, and it is chivalry is inseparable from titles, then there is small hope that the lady's wish will be gratified.—Montreal Star.

Area Under Irrigation In Alberta

In southern Alberta there are now ten large irrigation projects in operation comprising an area of slightly more than one million acres susceptible of irrigation from the 5,000 miles of canals and ditches already constructed.

British Youths Study Agriculture

An interesting group of British Public and Secondary School Students who have just arrived at Macdonald Agricultural College. These young men will pursue a two years' course of study at the college and during the summer months will work on farms where places have been provided for them. Recruited by the Department of Colonization and Development of the Canadian Pacific Railway the scheme under which these students have come to Canada is now entering its second year of operation. On completion of their studies these new arrivals will engage in various branches of Canadian agriculture by which time they will have become accustomed to Canadian methods.

Canada Makes Great Strides In Past Few Years In Work Of Aerial Mapping

Care At Shearing

Time Well Repaid

Clean Fleece and Next Rolling Of Fleeces Are Essential

With wool providing a very important proportion of the total revenue from sheep and with this product sold on a graded basis as it is in Canada, it is important to exercise care at shearing time, to cut off the Canadian Co-operative Wool Growers.

Clean wool, free from chaff, burrs, dung, blood, binder twine, and other foreign material and also from the short black or gray hairs found growing on the heads and legs, is worth at least twenty times as much as wool not so carefully cared for. With the weather warming up those sheep men who are anxious to get a good clean fleece from their animals before the fall rains are shearing now, although this work will not become general in the East for six weeks yet and in the West before the first of June.

Nowadays sheep are seldom washed prior to shearing. Washing had not got rid of all the grease and foreign material and the wool had to be secured when it reached the mill anyway, so today the work of washing or scouring is generally left to the mill, and the general practice is to sort the wool in the grease.

There were many disadvantages to washing on the farm anyway, one in particular being to get the wool into the shape for shearing. Furthermore there is nothing to be gained financially in selling washed wool as against unwashed.

Shearing should be done in dry weather on a reasonably warm day, and by means of a clean floor or piece of canvas. Before taking off the regular fleece all heavy fleeces and stained gray locks should be trimmed off.

After shearing the fleece should be spread on the floor fleece side down, the sides folded in and rolled firmly from neck to neck so that the best parts of the fleece, which are over the shoulder and heart girth, show on the outside of the regular fleece.

Wool fleeces are opposed to lying with under twine, pointing out that this, like the tufts of black or gray hair, which should not be included with the fleeces, will not take the dye when the wool is being processed, and therefore make it unfit for many uses. They advise using naphthalene, as supplied by the Wool growers to all their shippers, or if this is not available the using of this neckpiece, which is twisted into a rope and passed once around the fleece which is then tucked in.

Standard wool socks which are made in 15 to 25 fleeces are advocated for packing the wool in after it is clean. This is not available, really clean fleeces. Tight packing in these sacks is very essential as it means less shrinkage in weight. Store the wool in a dry place until sold.

Loggers Great Egg Eaters

Not Unusual For One To Eat Half Dozen For Breakfast

Poultry producers in British Columbia have been giving more attention than usual, of late, to the local market afforded by logging camps. Logging camps afford a profitable market for a number of individual poultrymen. Loggers, as a whole, are great egg consumers.

A poultryman has just compiled a list of logger camps, which is being printed, totalling 3,200 men. Loggers are served with eggs without stint for breakfast. It is not unusual for one logger to eat half a dozen eggs as a starter for the day.

Ant Have Fire Brigade

Some ant-hills have their own fire brigades. A woman naturalist in France discovered this by placing a lighted taper on a hill. A battalion of ant firemen promptly appeared and extinguished it by squirting liquid formic acid from their jaws on the taper, while others tore it to shreds. Many of the ants were killed, and one hero dragged another from danger.

Canada is taking pictures of herself from the air at the rate of some 60,000 square miles a year. In other words, Canadian flyers are adding to the aerial maps of this country an area equal to two-thirds of Great Britain and Ireland every year, according to N. C. Stewart, Victoria surveyor, who has recently returned from Ottawa after studying aerial mapping and general developments along this line.

These maps are not taken for any mere record, although they would be well worth while for that alone," said Mr. Stewart. "The maps are used for tracing mineral deposits, oil and timber resources, locating transportation routes, range land and water courses. The airplane is giving Canada the best opportunity she has ever had of studying herself and finding out just how big her resources really are."

Aerial mapping is a comparatively recent development in Canada, although in the last two or three years amazingly long strides have been made. In 1921, for instance, only 280 miles were mapped, while last year some 60,000 square miles. Last year the Royal Canadian Air Force made 4,000 photographs from the aerial direction from the topographical survey department.

There are two methods of aerial mapping—the oblique and the vertical. The former method covers territory much quicker than the latter, and is practicable in flat country, but in British Columbia it will be necessary to use the vertical method.

While the aerate production of maps from aerial photography calls for a good deal of ground control in cooperation with aerial work, the vertical method, an excellent means of making quick maps of new territory, a frequent demand in these days of rapid mineral and timber development in Canada, Mr. Stewart. He states that the new aerial maps of Northern Ontario and Manitoba show how detail may be obtained in the most rugged of the world's ground work. On some of the Ontario sheets thousands of lakes are shown, which were not shown on the records before the new pictures were made.

In the next ten years Canadian officials expect to make a million pictures of Canadian territory, according to Mr. Stewart. One-quarter of that number have already been obtained.

Canada Must Improve Barley

Professor Harrison Faint Markets In Europe Only Take Best Quality

Prof. F. J. Harrison, Manitoba Agricultural College, and Paul Hreid, recently from Europe, where they have been making investigations on the barley requirements of the Irish and the Scotch, Professor Harrison is preparing a report on his trip, but in the meantime is prepared to say that Canada has a large quantity of barley, plenty of room for improvement. Professor Harrison is making his plans for encouraging better quality. There is a market there for Canada's O.A.C.-21 in the distilling and malt trade, but not for brewing. With such quantities of excellent barley the European markets have plenty of opportunity to skim the tops, and it is only the best they want.

Beggar (to lady of house). Madam, I'm not asking you for food or clothes, not even for work."

Lady: "What do you want, then?"

Beggar: "You don't happen to have an old tire for my car, do you?"

Cadnium Produced In Canada

Cadnium was produced in Canada for the first time in 1928. It is used for plating purposes, in colour making, medicine, and dyeing.

"The woman was wonderful. In all my life I never have met a woman with such intelligence."

"Why didn't you marry her?"

"She wouldn't have me."—Kerika turn, Oslo.

WORLD HAPPENINGS BRIEFLY TOLD

Lord Revelstoke, who died recently in Paris, where he was attending the meeting of the reparations conference, left a half a million dollars to King Edward's Hospital fund for London.

The estimates tabled in the Newfoundland legislature provide for a total expenditure for 1928-29 of \$10,547,700 as against \$10,538,129 for 1928-28. The total funded debt of the colony is \$81,224,140.

The British ship "Cyclone" has left Iraq to protect British subjects in Abadiah, Persia, where mobs had got beyond control of police. Persian troops have been called to restore order.

Profound secrecy surrounds the building programme of the French Air Ministry. Everything about the Ministry building is in a turmoil and aviation factories are working day and night to carry out the programme.

A country-wide search for Miss Barbara Pitcher, missing McGill University student who disappeared in Montreal, March 21, was brought to an end with the finding of the young woman's body in Lake Beauport near a convent at Saint-Jovite.

To provide an outlet for surplus stocks of potatoes, the New Brunswick Department of Agriculture is encouraging the creation and sale of starch plants in the potato raising sections as a means of taking care of the small and otherwise unmarketable potatoes from the crop of succeeding years.

The Nationalist government state council announced that heretofore decapitation as a method of execution in China would be prohibited. Decapitation had been discarded by previous regimes but it was still used by the police and military authorities for executing bandits and robbers. Its complete abolition has now been ordered.

Cutting Corns With Razor Leads To Lock-Jaw

Don't cut corns with an old razor blade. Infection, followed often by death may result from putting corns with an infected razor. Quick, safe relief comes from using PUTNAM'S CORN EXTRACTOR. If afflicted with corns, callouses or sore blisters, use PUTNAM'S. It's reliable, and sure to relieve you of the corns as they drop right off. No pain, no soreness, but quick relief from corns come to all who use PUTNAM'S PAINLESS CORN EXTRACTOR. 25c. at all dealers.

Alberta Pool Elevators

The Alberta Wheat Pool made a definite start the other day in extending its country elevator system, when it was officially announced that 75 of these elevators had been contracted for and 12 others bought over from different interests.

"Why couldn't they get on together?" "Well, you see, he's a Scot and she would persist in wanting out his shaving brush every morning."

British piano manufacturers have captured both the American and New Zealand markets from their American rivals.

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acid. Don't use crude herbs. Use what your doctor would advise. The best help is Phillips' Milk of Magnesia. For the first time since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

Magnetic North Pole Reached By Canadian

Wireless Message Has Been Received From Major Burwash

A wireless message from under the mythical shadow of the Magnetic North Pole is the latest achievement of Canadian science.

Within a hundred miles of the place where Sir John Franklin and his men disappeared and died, Major L. T. Burwash, Canadian explorer, engineer and scientist, has sent word to the Northwest Territories branch of the ministry of the interior of his safety and whereabouts.

Major Burwash went into the Arctic alone over a year ago to make scientific observations at the Magnetic Pole, and to search for further relics of the Franklin expedition. Where Franklin and his men perished and died of starvation, Burwash lived on and carried out his scientific mission. He has now been ordered by wireless to make an investigation into the whereabouts of the copper deposits along the Coppermine River.

Search For the Brightest Boy

Tests, Edison To Grant Scholarship To Candidate Passing Test

Thomas A. Edison, grown grey in achievement and fame, has started out to find a boy to whom he may pass on some day the torch of his genius. He started a search for the brightest boy in the United States.

When he finds him, he is going to send him to college first of all. A scholar, taking care of all tuition fees for four years at whatever technical school the winner wishes to enter, will be awarded the high school and preparatory school boy who most intelligently answers a questionnaire to be made up by Mr. Edison.

The winner will be one of 49 to be picked, one from each state and one from the District of Columbia. Mr. Edison will pay the expenses of all 49 boys from their homes to his laboratory at Orange, N.J., about August 1. There he will put to them his questionnaire.

Okanagan Fruit Prospects

Despite hard winter weather there is very little injury to the fruit trees of the Okanagan Valley, and indications are for a fair setting of all fruit with fine prospects for the apple crop at the southern end of the valley.

Heck-A producer says that the movie of the future will be a combination of silence and sound.

Peck-A man says, like a man carrying on an argument with his wife.

Nation-Wide Fame.—There is scarcely a corner of this great Dominion where the merits of Dr. Thomas' Electric Oil have not been tried and proved. It is one of the world's most efficient remedies for sore throat, lame back, and many other ailments arising from inflammation. Rubbed on the skin its healing power is readily absorbed, and it can also be taken internally.

People expect too much of a boy who is at the growing age. When he has done his eating and his growing he has put in a pretty fair day.

We would say that a stable government is one in which the people remain hitched.

Indigestion

One tasteless spoonful in water neutralizes many times its value in the acid. The results are immediate, with this fact, you will never deal with excess acid in the crude ways. Go learn—why this method is the best.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acid. Each bottle contains full directions—any drugstore.

Canadian Legion

Dominion Convention To Be Held In Regina In November Of This Year

The Dominion Convention of the Canadian Legion B.E.S.L. will be held in Regina on November 25th, 1928.

To those ex-service men who are not members of the Legion, the present is an opportune time to become identified with the organization that has done much to promote the welfare of returned men, their widows and dependents.

The work of the Legion is not diminishing as the years go by, but rather is growing. The membership list is increasing and particularly so in Saskatchewan since the Provincial Convention, but in the province there are still a number of men who are eligible to join, and who have not as yet identified themselves with the organization, possibly due to lack of opportunity to do so.

With the increase of branches throughout the province, there is now local representation in practically every district, and the provincial secretary, Canadian Legion, Regina, will be pleased to advise anyone on request, of the nearest local branch.

Unity among returned men was accomplished when the Canadian Legion came into being some years ago. All that remains is to complete the membership and make the organization even more representative than it is today.

On its record of achievement alone, the Legion deserves the support of all ex-service men, and it is hoped that the next few months will see every eligible man in Saskatchewan enrolled. The dues are nominal, but the presence of every returned man in the ranks of the Legion will be of the utmost value in furthering the aims and objects of the organization, and in promoting that comradeship which is one of its biggest assets.

Useful In Camp.—Explorers, surveyors, prospectors and hunters will find Dr. Thomas' Electric Oil very useful in camp. When the feet and legs are cold, and the body is tired, a little of the Oil will soothe and soothe. It is useful in the prevention of pains in the muscles, and should a cut, or contusion, or sprain be sustained, rubbing the Oil will be better as a dressing or lotion.

A dentist is the only person who can tell a woman to open and shut her mouth at will and get away with it.

CANADIAN AIR MAIL PLANE ESTABLISHES WORLD'S RECORD

21st, covered the 340 miles from Toronto to Montreal in just one hour and forty-four minutes, and this has now been established as the world's fastest air mail flight.

Remarkable as this time is, Capt. Bonhurst would have bettered it, but for fog encountered a little over 140 miles from Montreal. Up to this point he has flown 215 miles in just 60 minutes, maintaining a speed of over 215 miles a minute.

Throughout the record-breaking flight Capt. Bonhurst reported perfect conditions from his plane which was fueled with Imperial Aeroline Spirits and lubricated with Imperial Marvel Motor Oil products which have become the almost universal preference of Canadian aircraft operators who choose them for 60 out of every 100 miles flown in Canada.

The entire world recognizes that Canada, in proportion to her population, is making greater practical use of aircraft than any other country and the "work" records of Canadian airplanes are regarded as even more important contributions to the advancement of aviation than the endurance and other stunt achievements of other countries.

Canada's latest and most impressive practical record in air is in speedy delivery of air mail and Capt. S. S. Bonhurst, pilot for Canadian Airways subsidiary of International Airways of Canada, Limited, as a result of a record flight between Toronto and Montreal, now holds the world's air mail speed record.

Capt. Bonhurst, flying a Fairchild "71," powered by a Pratt & Whitney Wasp engine, on March

The work of keeping the International Boundary between Canada and the United States in a state of effective demarcation was made one of the functions of the International Boundary Commission by a treaty signed at Washington on February 21, 1925.

An English physician claims that crying is good for one's complexion—provided, of course that one's complexion is one's complexion.

FOR ALL your baking, use **MAGIC BAKING POWDER** Made in Canada—No Alum!

MAGIC BAKING POWDER CONTAINS NO ALUM

Recipes For This Week

(By Betty Barclay)

FRUIT OMELET

- 1 egg.
- 1 cup grating orange rind.
- 1 teaspoon orange juice.
- Few grains salt.
- 1 orange.
- 2 tablespoons butter.
- 2 teaspoons powdered sugar.

Beat the egg slightly, adding the orange rind and juice and salt. Peel the orange, removing all white membrane, and cut into very thin slices. Sprinkle with one teaspoon of the powdered sugar. Melt the butter in a frying pan. Pour in the egg mixture and cook over a low heat, shaking the pan and pricking the mixture with a fork until all the mixture is cooked. Roll or fold and turn out on to serving dish. Sprinkle with remaining sugar and orange with rind of orange.

A BALANCED MEAT DISH

Shred one pound of lamb, beef or pork and brown in its own fat in a frying pan. Add one cup of chopped onion and celery tops, one tablespoon minced onion and one tablespoon salt. Cover and cook about ten minutes. Add two tablespoons four and two tablespoons butter mixed to gether and two cups canned strained tomato juice. Stir until the mixture is thick and bubbling, then serve.

Fixing Blame For Accidents

Most Drivers Usually Maintain They Were in the Right

Human nature at its most unreasonable point, is apt to be manifested after an automobile collision. It often happens to witness such a smash, and gathers in the bunch that collides around the two colliding cars, he will probably hear some loud and irrational arguing.

The two drivers, if the collision was serious, are suffering from nervous shock, and will say things they would not say under ordinary conditions. Some people have the manliness to admit they were wrong, but the ordinary thing is for each driver to maintain that he was wholly right and not to blame in any way.

The truth usually is that both parties were somewhat to blame, though one of them may have been principally at fault. These things happen so quickly that it is almost impossible to assess the responsibility with strict accuracy. But if either one of the two drivers had followed a policy of special caution, nothing would probably have happened.

New Silver Process For Purifying Water

German Scientist Discovers Cheap Method of Killing Germs

Sterilizing water for drinking purposes will be an easy matter if the method discovered by a Munich engineer, Dr. George Krause, proves feasible.

All that is needed to destroy the myriads of germs contained in 30,000 parts of water is to add a half grain of silver prepared by the Krause method.

A professor of hygiene at Greifswald University, Dr. Rudolf Dreitz, who has made a thorough test of the process, confirms the efficiency of the invention.

Within less than an hour he succeeded in completely sterilizing a cubic centimeter of water which contained a million germs.

The new method is said to have several improvements. It works independently of temperature, it can be applied to any quantity of water and needs no supervising.

Saskatchewan Hemp

Feasibility of Hemp Growing Has Been Demonstrated

With the object of promoting hemp growing in the district, the Northern Board of Trade has instructed its secretary to purchase and distribute quantities of hemp seed. The feasibility of hemp growing as an industry has been demonstrated by seven farmers in the area who have all had plots of four acres under cultivation. Although the seed was not sown until June last year, a fine crop, the hemp grew to a height of 12 feet. The Provincial Government is assisting in building up the industry. The nearest factory is at Portage La Prairie, Manitoba.

Short of Breath

Smothering Feelings Choking Sensation

Mrs. H. D. Dartmouth, N.S., writes: "For over a year I was troubled with smothering spells and shortness of breath, and it was impossible for me to walk, even a short distance, because of the choking sensation which followed. After trying many treatments, in vain, I at last decided to try

MILBURN'S HEART NERVE PILLS

and in a surprisingly short time they did me much good.

Try a box at all druggists or dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto.

Will Hold Flushing Matches

Some thirty-five teams in Saskatchewan have already signified their intention of holding flushing matches in the province this year, and it is expected there will still more.

Customer—You say this material is the very latest fashion? Assistant—The very latest material.

But what it made in the sun? No, it's been in our window for two years.

When intensely angry and searching for a fitting word to express yourself, say "Ridiculous," which, we are reliably informed, is the biggest dam known.

Bay Route Cannot Operate This Year

Impossible To Have Timings in Readiness Early Enough

While the Hudson Bay Railway may be ready for traffic early this autumn, it is altogether unlikely that harbor developments at Churchill or the aids of navigation which must be installed in Hudson Straits will be sufficiently advanced to permit of commercial navigation of the new northern route.

In order to open the route this year it would be necessary to have everything in readiness by October, as the season of navigation cannot be relied upon to extend past December, this is not deemed to be possible, but the route probably will be in full operation in the summer of 1929.

CHAPTER XIX—Continued.

Connie had rehearsed this moment a thousand times. She stood quietly on the steps for a moment, then slipped gracefully to the platform. Connie herself could not have imagined how changed she was. From confusion to dainty French heels she was dressed as if fresh from the hands of an expert Parisian couturier. She was dazzled by the fact that she positively took Donald's breath away. It seemed to him that she had grown like a magic rose, all at once from a tiny bud to a full blossom. No fault could be found with the perfect oval of her face, or with the delicate white rose skin, from which every trace of tan had gone. The long lashes that fringed her big blue eyes had turned a shade darker than the curling waves of her abundant golden hair.

Andy, whose small form had been hidden in the rear, moved haughtily forward, fumbling the wide hat held in his hand. "Edie, Connie," he burst out, his lips parted in a wide smile of welcome.

Instantly Connie forgot her assumed dignity and became her warm, impulsive little self. With a glad cry she flung her arms about Andy's neck and kissed him.

"Strike me pink!" breathed Andy, as his hand stole up to touch the spot where Connie's lips had brushed his cheek.

Connie turned to face the lake. "Oh, Dad!" she cried in ecstasy, "isn't it good to be back here again?" She stretched her arms toward the ice-cold peaks. A gentle breeze swept down the wooded slope to fan her face as though in welcome. The blood surged beneath her smooth white skin and went singing through every vein. "Ah!" she sighed happily, as she inhaled a deep breath of air laden with the colour of pine from the hills she loved. Donald, looking at her hungrily, saw tears brimming under her long lashes.

From the far end of the train a tall, grey-haired man sat in a slender sweet-faced woman to the ground, and then walked towards the station. As they stepped to the platform the woman's eyes rested on Donald, who stood with his back to her. Instantly she became restless to the spot, eyes, one hand fluttering toward her heart. With the supreme, wondrous mother-love shining in her eyes, she held out her arms.

"Donald!" she cried passionately, "Donald!"

Donald whirled at the sound of the loved voice calling his name. His heart throbbed wildly, his throat felt constricted and his face paled under stress of strong emotion.

Simple Precautions Against FLU

Sore Throat

— The Danger Signal

Health Authorities Point Out The Necessity Of Treating The Simple Cold At Its Beginning

Nearly every case of "flu" starts with a simple cold. At first the throat is sore—often just a little hoarse—soon the infection goes lower—then the chest is affected. A safe plan is to gargle the throat three times daily with "Nerviline"—this will keep the throat free from germs. If there is any sign of tightness in the chest, rub on Nerviline—every drop will penetrate deeply—congestion will be relieved—the cold will break up quickly. Many a dangerous case of "flu" can be avoided by this simple home treatment.

Of course it is always wise to take some relaxing medicine, and for this purpose immediate results will be secured from Dr. Hamilton's Pills—they purge the system of impurities and carry off a lot of disease-breeding wastes.

This combination treatment of Nerviline and Dr. Hamilton's Pills is very effective for Grippe, Influenza, Bad Colds, etc., and can be relied upon to give very satisfactory results.

ly. "It seems as though I had been gone for years. And now, it is so nice to be home again!" She sank to a chair between Andy and the trapper. "Do you remember, Andy, when you were dressed as a butler and danced with John at our party?" She threw back her golden head and her silvery laughter filled the room.

Janet was unhappy from the moment of Connie's arrival. She had caught the look of adoration in Donald's eyes as Connie stepped to the station platform. Standing there then she had quite definitely abandoned any hope of winning him. And Janet had been so sure that once she had held a place in his heart. A great depression, a great weariness of spirit, settled upon her.

That evening, as Donald walked with his parents by the lake-shore, he turned to his father. "Dad," he said anxiously, "do you think I have made good? Will you forgive me for—"

John McLean's eyes grew sudden-ly misty. "Donald," he began gently, "Mr. Renne has told us all about you. And no man could speak more highly of another." He drew a newspaper from his pocket. "Haven't you seen this?"

It was Vancouver's morning paper with a full-page devoted to the visit of the Eastern lumbermen. There were several photographs of the Summit Mill and one of Donald. The paper spoke of him as "the able young engineer whose modern ideas and energy had led to British Columbia a logging plant and mill that were a credit to the Province."

Donald saw the proud light in his father's eyes. His heart was filled with a great peace.

The next day carpenters and material arrived for the construction of Walnwright's new home. That afternoon, Connie, clad in fashionable riding habit, came to the mill office with her foreman to place an order for lumber. Pegans in silver-mounted britches and English saddle was proudly bridle. With neck arched and curvetted and rocket while Connie sat on his back with that complete lack of self-consciousness that is the heritage of a born horse-woman. Before leaving she rode up the hill among the tolling towers, her irresistible smile bringing an answering grin to the foreman's, who doffed their hats and shouted a joyous greeting.

All day pack-horses and men struggled up the hill, staggering under the weight of building material. But although Donald strained his eyes for a glimpse of the golden-haired rider, he saw her no more that day.

(To Be Continued.)

Little Hints For This Week

"Obey My voice, and I will be your God, and ye shall be My people."—Jeremiah viii 23.

Three things bear up Dominion; Knowledge, Will; These twin are strong, but stronger is Obedience. It is the great tap-root of heaven-sent dominion. It is the great tap-root of heaven-sent dominion. It is the great tap-root of heaven-sent dominion.

"Tendancy of will lies at the root of all courage; but courage can only rise into true manliness when the will is surrendered; and the more absolute the surrender of the will, the more perfect will be the temper of our courage and the strength of our manliness."—Strong Son of God's Book.

And that strong Son of God, to whom this cry has gone up for many a day, and in all days, has left us the secret of His strength in the words, "I am come to do the will of my Father and my Father."—Thomas Hughes.

Minard's Liniment relieves pain.

W. N. O. 1785

Heating By Radio

French Scientist Says Wireless Waves Can Be Used To Warm Homes

Wireless beams from the Eiffel Tower may be employed to furnish heat for the residents of Paris. Tentative plans drawn by French engineers are put into effect.

Heating plants deriving their power from radio waves are operating successfully in Germany, according to Jacques Ristler whose report forms the basis of these plans. Ristler said that while the question of wireless heating houses is still in the experimental stage, the feasibility of it has been definitely established.

Explaining how the wireless heating plant would operate, Ristler said: "In the laboratory two posts were set up about 30 feet apart. The sending post sent out from 400 to 600-volt current waves of two to three meters in length. All that is to be done is to interpose on the receiving post circuit a filament in vacuo, and it is raised to an incandescent state and gives out quite appreciable heat."

There is therefore no theoretical difficulty in installing in a number of series of receiving posts which would in reality be just so many electric radiators. This system could be extended ultimately to an entire district or to a whole city, which would derive its heat from one central broadcasting station.

Rents Home By Wireless

Member Of Byrd's Party Comes Deal In New York

Willard Vander Veer, one of the motion picture operators with Commander Byrd's South Pole expedition, closed a lease for a Westchester apartment by radio from a point somewhere in the southern extremity of the world. The lease covers a suite in the Dorset, Bronxville, which had been selected by Mrs. Vander Veer.

Several days ago she sent by radio a description of the apartment, the rent asked and other particulars to her husband in the great expanse of ice near the South Pole, never really expecting that it would reach him. She was surprised, therefore, to receive a message at her home, 831 Homestead Avenue, Mount Vernon, from her husband to close the deal.

Newsclips succumb to Minard's Liniment.

California is likely to become the first horseless state in the United States, for horses are rarely used there now except in isolated regions.

Great works are performed not by strength, but by perseverance.

No Medicine Like Baby's Own Tablets

Once a Mother Has Used Them She Will Use Nothing Else

To once use Baby's Own Tablets is to use them continually—that is as long as there are young children in the home. That is the testimony given us by mothers from all parts of Canada. They all say that they know of nothing to equal the Tablets that they find them safe and efficient and at the same time pleasant to take.

The eldest John Hollowell, Madelon, Ont., writes:—"I have three children, three boys and one girl, the youngest nine months old. I have always used Baby's Own Tablets for them and have found no other medicine to equal the Tablets as a relief for the many ailments of childhood."

Baby's Own Tablets are a mild but thorough laxative which regulate the bowels and soothe the stomach. They drive out constipation and indigestion, break up colic and simple fever and make the cutting of teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

A Foremost Fur Producer

Canada is one of the foremost fur producers of the world. Raw furs are the chief commercial product of the wild life of the northern half of the continent and as such represent the only economic return from large areas in the Dominion.

Great works are performed not by strength, but by perseverance.

To once use Baby's Own Tablets is to use them continually—that is as long as there are young children in the home. That is the testimony given us by mothers from all parts of Canada. They all say that they know of nothing to equal the Tablets that they find them safe and efficient and at the same time pleasant to take.

The eldest John Hollowell, Madelon, Ont., writes:—"I have three children, three boys and one girl, the youngest nine months old. I have always used Baby's Own Tablets for them and have found no other medicine to equal the Tablets as a relief for the many ailments of childhood."

Baby's Own Tablets are a mild but thorough laxative which regulate the bowels and soothe the stomach. They drive out constipation and indigestion, break up colic and simple fever and make the cutting of teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

A Foremost Fur Producer

Canada is one of the foremost fur producers of the world. Raw furs are the chief commercial product of the wild life of the northern half of the continent and as such represent the only economic return from large areas in the Dominion.

Great works are performed not by strength, but by perseverance.

There is a grade of Marvelube refined to meet exactly the specifications of your Marvelube Chart at Imperial Oil service stations and dealers.

Marvelube is a better motor oil made from Peruvian crude.

THE EMPRESS EXPRESS

Published in the interests of
Empress and District
K. S. Sexton Proprietor A. Haskin

Subscription price \$2.00 per
year to any part of Canada
or Great Britain.
\$2.50 to the United States

Thursday, June 6, 1929

Robert Miller left on a trip
to Swift Current, Monday.

Mrs. H. Demorest, who was
a delegate to the W. I. Con-
vention at Edmonton, returned
on Monday night.

Weather of the past few
days has been summer-like, and
the crops are making rapid
progress.

Dave Lush who has just re-
turned from an extensive trip,
reports crop conditions as gen-
erally good.

Mrs. F. H. Gifford, of Gifford
Pais, Man., is the guest of Mr.
and Mrs. P. D. Dalg. The young
son of Mr. and Mrs. Dalg ac-
companied her here.

Never worry about the fel-
low who gets lemons. For he
really gets the lemons when they
fall.—Blackie.

South Saskatchewan river is
now at flood height, and all fer-
ries are out of commission.
Debris and dead cattle are be-
ing brought down by the wat-
ers.

Miss Kathryn Hoffmann,
Lonsome Coulee, left Oyen
on early train, May 31st, for St.
Paul de Meis, Alberta, where
she will take first year training
for a nurse at St. Theresa Hos-
pital, the last two years of the
course to be at Edmonton.

The regular meeting of the
I.O.D.E., which was postponed
this week, will be held on Tues-
day next, June 11, at 3.30 p.m.,
at the home of Mrs. E. S. Sex-
ton.

A ball team from Empress,
with a number of supporters,
took to the sports at Burstall,
Monday. There was a very
large attendance present. The
Empresses were successful in
their first game against Hills,
but lost out in their second
game with Burstall.

Labor Placements Indi- cate Industrial Growth

Indicative of the industrial
growth in Alberta during the
last year is the preliminary re-
port submitted during the past
week by Walter Sautman, Com-
missioner of Labour. Total
placements through the provin-
cial employment service num-
bered more than 2000 over the
previous year's figures. Em-
ployees under the Factories Act
in the male section increased
by 24 per cent, and in the fe-
male section by 82 per cent over
the preceding year.

Of vacancies for males re-
ported 99.2 per cent were filled
and of male applicants 89.2 per
cent were placed, corresponding
figures for female employment
being 81.2 per cent, and 90.6
per cent.

Mountain Highway

Open For Season

Of interest to large numbers
of tourists is the announcement
by J. J. Webster, Secretary of
the Alberta Motor Association,
that the Lake Louise highway
and the Banff Windermere
highway have been opened dur-
ing the past week for the sea-
son's traffic.

Miss Cote, who has been a
member of the nursing staff
at the local hospital, left on
Friday by car, for Jenner.

"FATHER'S DAY"

JUNE 16th

"Father's Day"
the chance for ev-
ery Son, Daughter and
Wife to remember Dear
Old Dad. Maybe you
call him 'Dad', maybe
'Old Man' or just 'Pop'
—perhaps he sits with
his knife and sits in
the front room with
his shoes off—be that as
it may—taking it all
in all, he's been a
pretty good son
through all these years, and isn't he at least worth
remembering on Father's Day? Give him a

Tie, Shirt, Sox, Cap, Belt
or Pajamas

SANDY, the Clothier

**BIG Car
Beauty Style
Performance
and
something
more-**

IT takes more than mere size to make a
BIG SIX. It takes more than beauty, more
than style, more than performance. True, a
car needs all of these before it can become a
BIG SIX. True, Pontiac Big Six has all these.
But it has something more . . . something that
stamps it once and forever as a real BIG SIX.
It has the "feel" of a BIG SIX. People ac-
customed to much driving will know immediately
what that means.
And it's not a sensation you can counterfeit.
You have but to sit behind the wheel, drive the
car and get the "feel" of it . . . you'll know in
an instant whether or not you are driving a
BIG SIX. P-23-3-310
